# TARGETED COOLING & AIRFLOW MANAGEMENT

# **VENTILATION UNITS**

DP-VEC/VEN-06

Once installed within Conteg cabinets, IT components require sufficient airflow to help them remain cool and functioning properly. When sufficiently cool environments cannot be sustained, they require assistance: installing Conteg ventilation units. We offer different styles, sizes, types and accessories - we've even developed DP-VEC units with highly efficient EC fans, to reduce operation costs.

#### **EC TECHNOLOGY:**

Efficient, ecological and economical! New high-quality fans (produced in Europe by the reputable Ebm-papst) feature electronically commuted (or EC) synchronic motors, which offer very low power consumption in comparison to standard AC motors. In fact, power consumption of our new DP-VEC ventilation unit is seven times lower than the standard DP-VEN, which has equal airflow. Additionally, our DP-VEC provides up to 60% more airflow (with an equal number of fans and required air pressure) than DP-VEN.
